

## Business Messaging Is Essential Today. MessagePro Delivers Solutions for Your Needs.

MessagePro provides a full suite of business messaging products to meet the complex needs of businesses interacting with consumers, other businesses, and their own staff. MessagePro solutions include text enabling existing business phone numbers, secure messaging, fax, interactive messaging, and interactive telehealth applications.

### **HOT SERVICE: Business Text Messaging Using Your Existing Phone Numbers**

Phone Calls and E-Mail Are Often Ignored. Use MessagePro Office to send and receive text messages using your business phone numbers.

Emails, Voice Messages, and Phone Calls are regularly ignored. But statistics show that text messages have a **98% open rate** and that the average **response time to a text is 90 seconds**. Surveys shows that **90%** of business leads would rather receive a text message than a phone call.

Text messaging is needed by every business, across every sector and into every demographic. People would rather text than talk particularly for routine questions. Every business must have a strategy in place to manage this important communication channel, or their customers may leave them for someone who does.

**We make sending and receiving text messages as easy as using email.**

# Use MessagePro Services to Meet Your Needs
